

Testing Report - Application Health Check - SC_001

Report Timestamp: 07-17-2025, 14:13:42

Testing URL: <https://bigappmarket-dev.appiancloud.com/suite?signin=native>

Testing Environment: QA

Current Network Speed: Test Test

Test Introduction

To verify health of the application by clicking all buttons, tab, link texts, and navigating to different pages.

Test Methodology

The test methodology used in this performance test focusing on page load time to measure how quickly a web page loads at different section under various conditions, including different network speeds and user traffic loads. By analyzing the page load times across different sections of the application, the testing aims to pinpoint areas of optimization, such as server response time, content delivery, and front-end performance, ensuring that the page loads efficiently and provides a seamless user experience.

Test Summary

* To verify data input to username field

Result: Passed

Right click on image and select Open link in new tab

* To verify data input to password field

Result: Passed

Right click on image and select Open link in new tab

* Clicking Login button

Result: Passed

Right click on image and select Open link in new tab

* Clicking Home link text

Result: Passed

Right click on image and select Open link in new tab

* Clicking Cases link text

Result: Passed

Right click on image and select Open link in new tab

* Clicking Users link text
Result: Passed

Right click on image and select Open link in new tab

* Clicking Monitoring link text
Result: Passed

Right click on image and select Open link in new tab

* Clicking Notes link text
Result: Passed

Right click on image and select Open link in new tab

* Clicking Case Number link text
Result: Failed

Right click on image and select Open link in new tab

Reason: Test case failed due to No web element found for test step - : [Clicking Case Number link text]. Element locator used - :
//*[@id="XrayComponentSelectionManager"]/div/div[2]/div[1]/div/div/div/div/div[2]/div/div[2]/div/table/tbody/tr/td/div/p/a[te xt()='

* Clicking Summary tab
Result: Passed

Right click on image and select Open link in new tab

* Clicking Documents tab
Result: Passed

Right click on image and select Open link in new tab

* Clicking Communication tab
Result: Passed

Right click on image and select Open link in new tab

* Clicking Notes tab
Result: Passed

Right click on image and select Open link in new tab

* Clicking SmartIngestionAudit tab
Result: Passed

Right click on image and select Open link in new tab

* Clicking Program Filing-Preparation Button
Result: Passed

Right click on image and select Open link in new tab

* Clicking Upfront Analysis Button
Result: Passed

Right click on image and select Open link in new tab

* Clicking In-depth Analysis Button
Result: Passed

Right click on image and select Open link in new tab

* Clicking Negotiation & Quotation Button

Result: Passed

Right click on image and select Open link in new tab

* Clicking Authorization Refusal Button

Result: Passed

Right click on image and select Open link in new tab

Note:

1) Python version: 3.11

2) Jenkins version: 2.514
